INTRODUCTION

The Department of Advanced Education works with other government departments to ensure that there are adequate numbers of appropriately trained persons to provide the health and social services required by Albertans. An inter-departmental committee (the Alberta Health and Social Services Disciplines Committee) composed of representatives from the Departments of Advanced Education, Career Development and Employment, Community and Occupational Health, Hospitals and Medical Care, and Social Services, is charged with coordinating efforts in this area. The Committee initiates the collection of information to provide an overview of supply and demand for health and social services manpower. This information aids post-secondary educational institutions, service agencies and government departments in making decisions pertaining to manpower planning in the health and social service fields.

The Inventory provides information on the output of health and social service training programs in the Province. The data, which primarily report enrollee and graduate statistics, are used in conjunction with information provided by the service sector to identify future demand which may be placed on the post-secondary education system and to assess the capability of the system to meet that demand. Additional information on manpower supply and demand is available in the Alberta Health and Social Services Disciplines Committee Annual Report.

This inventory is not intended to provide descriptions of the various health and social service programs. Calendars that provide detailed program descriptions can be obtained by contacting the registrar's office of the appropriate vocational centre, college, technical institute or university.

The information in this inventory is for the academic years 1982-83 to 1986-87 and it will continue to be updated on an annual basis.

Further information on the Inventory can be obtained by contacting:

FORMAT OF INVENTORY

The information in this inventory is categorized according to health and social service discipline and is standardized to include the following information:

1. a list of training programs and institutions offering the programs;
2. data on the number of applicants, enrolments and graduates in the academic years 1982-83 to 1986-87; length of programs; intake and graduation dates; quotas; and,
3. a "Comments" section to qualify the data.

Blanks are used when information is not applicable to a program. The most common example of this is found in programs which do not have part-time (PT) students. In these cases the PT columns on the tables will be blank. The tables differentiate between part-time and full-time students wherever possible. Where this is not possible, a comment is added.

The tables are structured, where possible, as follows:

: Academic Year :	1982-83 :	1983-84 :	1984-85 :	1985-86 :	1986-87 :
: Quota :	20 :	:	:	:	:
: Applicants :	FT PT : 27 :	FT PT :	FT PT :	FT PT :	FT PT :
: ===== :					
: Enrolments :	:	:	:	:	:
: First Year :	20 :	:	:	:	:
: Second Year :	:	19 :	:	:	:
: ===== :					
: Graduates :	:	18 :	:	:	:

If information on the attrition from a particular class is required, it can be obtained by following the enrolments from the first year of a particular program through to graduation. For example, in the above table, the second year enrolment shown in the 1983-84 column represents the same class shown as first year enrolments in 1982-83. The number of graduates from this two year program is shown as graduates in 1983-84. The attrition over two years is therefore two students.

DATA COLLECTION AND DEFINITIONS

To collect the data presented in this inventory, the Program Coordination Branch of Advanced Education sent request forms to the head of each program. The format of the request forms were identical to the table format used in the Inventory. The program heads were asked to fill in the required information for the most recent academic year and to return the forms. Follow-up telephone calls were made when required.

Terms used in the data request forms were defined as follows:

1. applicants: the number of applications to a program from which enrolment was chosen for a given academic year.
2. enrolment: the number of students accepted by the program in the first intake of a given academic year, plus any additional enrolments resulting from subsequent intakes during that year.
3. graduates: students who completed program requirements and were awarded certificates, diplomas, or degrees.
4. academic year: the period commencing September 1 to August 31 of the following year (e.g. September 1, 1986 to August 31, 1987).

In interpreting data, it is important to note the following:

1. The quota refers to the optimal capacity of the program and is used as a general guideline for enrolment. Quotas are occasionally exceeded due to anticipated attrition or student transfers between programs.
2. The deadline for accepting applications varies from program to program. While some program heads adhere to a set deadline, others limit the number of applications accepted.
3. Students often apply to more than one program in any given year. For some programs, students will apply to an affiliated health and social service agency rather than to the program directly.
4. Enrolments are classified according to year of study depending upon the level of the majority of courses taken. Enrolment figures may increase between years of study due to students transferring into a program or repeating a year.
5. The comments which follow the enrolment data qualify the information provided and should be reviewed carefully to avoid misinterpretation.
6. Provincial summaries are provided on brown pages to summarize the enrolment data of all programs falling under a similar category heading.

: Graduates	: 14	: 12 2	: 26	: 13 1	: 15	:

COMMENTS:

1. The program intake is determined by direct federal grants.
2. During the 1984-85 academic year, Lac La Biche ran two Community Health Worker programs.
3. Since many prospective students apply directly to the Band Council rather than to the A.V.C., the number of applicants has been estimated.

COMMENTS:

1. Beginning September 1985, the curriculum was revised to incorporate a two-year diploma program. Students receive a certificate after one year but usually return to upgrade to a diploma in order to meet employment requirements.
2. As of 1985-86, enrolment data include figures for an outreach program at Slave Lake.

COMMENTS:

1. This program was referred to as "Correctional Justice Certificate and Diploma" in previous editions of the Inventory. A one-year certificate is still available but is designed primarily for individuals already employed in the corrections field. Students who received diplomas did not, in most instances, previously receive a certificate.
2. In 1982-83, only diploma-level students were registered. The diploma program was under review from 1983-84 to 1984-85; only the certificate program was offered during that period.

COMMENTS:

1. The COC program is offered on an inservice, contract, part-time basis at correctional institutions, with completion of certificate possible in a minimum of two years. There is no set quota for the certificate program.
2. The 1982-83 and 1983-84 quotas apply to the Justice Administration Department as well; hence the variance from subsequent quotas.
3. In 1984-85, three part-time students in second year were former graduates of the program who returned for upgrading.

3. Part-time students have a maximum of six years to complete the program.
In recording data, part-time enrolments are carried over from year to year; hence discrepancies between applicant, enrolment and graduate figures may occur.

COMMENTS:

1. First-year enrolments for 1984-85 include 14 students who returned to complete their first year of studies.
2. Graduate figures refer to only those students who have convocated. Graduates who completed the program in June do not convocate until January of the following year, and are therefore included in the statistics of the latter. Graduate figures may exceed third year enrolments as a result of late entrants repeating the program.

COMMENTS:

1. Enrolment figures may be misleading in that some full-time students may change their actual status to part-time during their course of studies, while still classified as being full-time. These "full-time" students, as well as regular part-time students, may take up to six years to complete the program.

NURSING (POST-BASIC CERTIFICATES)

PROVINCIAL SUMMARY¹:

The following is a list of the Post-Basic Certificates which are offered in the province.

COMMENTS:

1. The University of Alberta Hospitals has placed the Cardio-Vascular Intensive Care Nursing and Operating Room Nursing Programs under review since 1982-83. Also, the University of Alberta has discontinued offering Advanced Practical Obstetrics and Nurse Practitioner Certificates since 1982-83. Data for these programs are available in previous editions of the Inventory.

COMMENTS:

1. The quota for the first course in the program is 100, and 50 for all courses thereafter.
2. The program is offered through Distance Delivery and is geared to part-time students. Those who wish may complete the program within one academic year, though few do. This accounts for the low number of graduates in comparison to enrolments. The reporting format was revised in 1985-86 to reflect only new program applicants and a FTE enrolment count.

COMMENTS:

1. Intake and graduation dates vary for each program. Individualized programs encourage students to complete course requirements within six months.
2. Students enrolled in the Refresher Nursing program for credentials may write the CNATS examination before completing coursework, and will often not return to finish if successful. These are defined as graduates after 1984-85.
3. Lethbridge Community College data include enrolments at the Chinook Educational (Pincher Creek and Crowsnest Pass) Consortium.
4. The Nursing Refresher offering at Olds College was suspended in 1986-87 due to insufficient demand for the program.

2. A separate category for Nursing Assistant Refreshers has been included this year; hence the variance in enrolment data from those provided for the regular programs in previous editions of the Inventory.

COMMENTS:

1. Quota figures refer to the on-campus program and do not include the quotas set for off-campus delivery.
2. A separate category for Nursing Assistant Refresher has been included this year; hence the variance in enrolment data from those provided for the regular program in previous editions of the Inventory.
3. Determining the number of applicants is difficult since applications are carried over from one intake to another, and students may be referred from manpower offices rather than apply directly to the program.
4. Enrolment and graduate figures include data from off-campus locations.

3. Students enroll in a pre-professional year and are admitted officially to the second year of the program. Part-time students are included in the 1983-84 and subsequent enrolment figures. Increases in fourth-year enrolments resulted after admission was granted to post-diploma students.

: Graduates	: 97	: 75	: 60	: 66	: 77	:

COMMENTS:

1. The quota figures make allowance for transfer students. Continuing second-year students are not counted when determining the quota. The quota reduction in 1985-86 reflects program revision intended to reduce attrition and increase the number of graduates of the program.
2. Transfer students with credit for first-year course work have in the past been admitted into the second year of the program; hence the discrepancy in enrolment from year to year.

COMMENTS:

1. The quota does not include 22 spaces temporarily available for a Degree Completion component to the program.
2. The increase in the number of students from third to fourth year is a result of several students returning each year to upgrade their diplomas, and also the inclusion of students in the Degree Completion program.

1. The University of Calgary offers this program in Edmonton and Lethbridge, with cooperative links to the Universities of Alberta and Lethbridge. Figures include data from all three locations.
2. Except for mature, non-matriculated applicants, students are not eligible for admission to the Faculty of Social Welfare until the second year.
3. Graduates include both full-time and part-time students. Students do not always convocate within the same reporting period as when they complete the program; hence graduate figures may exceed fourth-year enrolments.
